Organic no-till brings together the environmental benefits of organic production—eliminating chemical pesticides and fertilizers and improving soil quality through composts and cover crops—with the conservation benefits of reduced or zero-tillage.

This one day event brings together researchers, farmers and extension educators to share their successes and challenges encountered on the road to perfecting a farming system that may become one of the best alternatives for farming in the future.

Speakers will include:

- Dr. Tim LaSalle**, CEO, Rodale Institute
- Dr. Ron Morse**, Professor of Horticulture, Virginia Tech
- Dr. Paul Hepperly**, Research Director, Rodale Institute
- Jeff Moyer**, Farm Director, Rodale Institute
- Matt Ryan**, Rodale Agroecologist and PSU doctoral student
